DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-10 are rejected under 35 U.S.C. 102(b) as being Johnson et al (U.S. Patent No. 6,203,511. Johnson et al discloses a mechanical joint for pivotally connecting two members, particularly to members of orthopedic or orthotic device comprising elements as recited including a joint (10), elongated portions (36, 58). Figure 9-11 illustrating the joint (10) is incorporated with the cuffs (106, 38). Figure 1 details the joint (10) comprising an elongated clevis-like member (14), a pair of cooperating discs (16, 18), a cover plate (29) having a pin (22) projecting inwardly from interior surface (24), an interior threaded bushing (26) and complementary fastening member (28) and a flanged bushing (30) which provides bearing surfaces (32, 34). Figure 1 further details the discs (16, 18) having curved slots (54) wide enough to receive the pin (2), the discs (16, 18) also comprising a plurality of outwardly extending serrations (48) on circular edge (50), as well as the discs (16, 18) may include an indicia (50). The slots (54) could extend substantially around the entire radial extent of discs (16, 18). However, in the illustrated embodiment, the slots (54) have approximately a 120° radial extent.
